Price: We price up at $20.00 per user. For your 10 users it will be $200.00 per month. This gets you unlimited local and long distance calling plus all of our features. As we discussed, I will be able to get down to $15.00 per user whenever you are ready to purchase. Tax/fees are about $3.00 per user.

Features: http://voice.phonebooth.com/rs/bandwidthphonebooth/images/PhoneboothOnDemandFeatures2012.pdf

Phones: www.phonebooth.com/phones - I recommend the Yealink Phones.

Fax: We actually don't do faxing on our service. I recommend a few third parties for this type of service that are solid and cost effective. Internally we use www.efax.com. Two others that I've heard good things about arewww.hellofax.com and www.myfax.com. If you already have something that works, then I would recommend staying with that.

Network: One of the things that sets us apart from any other Voip provider is the fact that we own our own network. inetwork is the network that we own and operate. It's one of the biggest nationwide network's in the country. It's on pace to run over 20 billion minutes this year. Unlike our competitors we don't have to send our calls over third parties. This allows us to keep our costs low and provide the highest call quality.

How we compare to other VOIP Providers
